

Pretensioning ring for clutch assembly and removal

Application/vehicle type:
Saab 90, 99, 900

Instructions for use:

Before removing the clutch cover assembly, the correct size prestensioning ring is inserted between the cover assembly and the diaphragm spring. On refitting the cover assembly, the prestensioning ring must be located in the same position as for removal by using the prestensioning device 400 0016 10.
